## INTRODUCTION 1

In this survey, some questions will be about health, relationships, and experiences relating to sex. It will also ask some other details such as gender, ethnicity and employment. A "Prefer not to say" option will be available for you to select, if you wish. Ipsos is running the survey and collecting such data in order to understand how the COVID-19 pandemic, and public health response to it have affected health, relationships and sex.

The research team will use the information to help sexual and reproductive health service providers respond to changing needs. You can take part no matter what your background or experience is. There are no 'right' or 'wrong' answers and we are not judging the choices people make; we are simply trying to understand how things have changed and why.

## INTRODUCTION 2

Ipsos has been commissioned by University of Glasgow, University College London (UCL) and London School of Hygiene and Tropical Medicine (LSHTM) to carry out this research. These researchers are part of the team that has conducted the National Survey of Sexual Attitudes and Lifestyles (Natsal). Natsal has taken place since 1990, and to date, has interviewed >45,000 participants (www.natsal.ac.uk).

*(textfill if sample=panel)* "Thank you for taking part in our first survey last Summer. This second survey will provide an important update on people's relationships throughout the pandemic. Some of the questions may feel repetitive but we're interested in finding out if things have changed and if they have stayed the same. You may be asked to take part in a third survey in the next 12 months." / *(textfill if sample=fresh).* "If you choose to take part, you may be asked to complete another survey in the next 12 months."

Each survey will take about 20 minutes to complete.

## INTRODUCTION 3

Participation is completely voluntary. Some of the questions may feel quite personal. Please answer them as accurately as you can. You can skip questions if you do not wish to answer them and you can stop the survey at any time. Your survey answers will be combined with the answers from all other participants and used for social research reporting, and your personal data will be held for no longer than 18 months. Your personal data will be held by Ipsos MORI for up to 18 months in order to contact you for one further follow up survey. University of Glasgow, University College London (UCL) and London School of Hygiene and Tropical Medicine (LSHTM) will have access to anonymized survey data which does not contain any personal identifiers such as name or date of birth.

## INTRODUCTION 4

We will keep the information confidential and store it securely in a password-protected electronic format. The data will be used for research and learning, and deposited securely at the UK data archive (https://www.data-archive.ac.uk/). It will not be possible to identify you from this data.

You can read the project specific privacy notice here.

*CONSENT*

Do you accept the collection of personal sexual and health, gender and ethnicity related data?

1.     Yes, I accept
2.     No, I do not accept *[STOP interview]*

# Demographics questions (first section)

## GENSEXINT

The first set of questions ask about you. This information will help us understand how people's experiences vary.

We will be asking you to think about things that have happened over the past year, since the start of the **first lockdown**. This was when the government first instructed everyone to leave their houses only for essential purposes (e.g. shopping, exercise, medical needs). In Britain this date was the 23rd March 2020.

Information, advice and support on the topics covered in this survey can be found HERE [Thank you screens].

## GenIDx

The next questions are about your gender and how your sex was described at birth. We ask these to make sure you are asked the right questions throughout the rest of the survey.

Please describe your gender identity.

[Open text: up to 150 characters]

## Sexbirth

Not all people feel that the sex they were described as at birth matches how they feel about themselves today.

So, to check, at birth, were you described as...

1.  Male
2.  Female
3.  Prefer not to say

**Genderidentity (derived variable for use in scripting)**

If gender=male (1) and sexbirth=male (1) == [derived variable] genderidentity=1 (cisgender man)

If gender=female (2) and sexbirth=female (2) == [derived variable] genderidentity=2 (cisgender woman)

If gender=female (2) and sexbirth=male (1) == [derived variable] genderidentity=3 (trans person)

If gender=male (1) and sexbirth=female (2) == [derived variable] genderidentity=3 (trans person)

If gender=in another way (3) == [derived variable] genderidentity=3 (trans person)

If SexBirth= prefer not to say (3) == [derived variable] genderidentity=4 (missing)

## RelStat

# Sexual history and partners

### SHIntro

The next questions are about your sexual experiences. Some of these questions may feel quite personal, but they are important for us to understand the impact of COVID-19 on people's sex lives.

You will be asked questions about your sexual experiences more recently, but first you will be asked about your sexual experiences before the start of the first lockdown to provide context.

As a reminder, your participation is entirely voluntary and the answers people provide will be combined so that no individuals can be identified. You can skip any questions you do not want to answer by selecting 'prefer not to say'.

### EverSexExp1

[Ask all]

Single answer

Have you **ever** had **any** kind of sexual experience or sexual contact with another person?

This includes anything that felt sexual to you. It could be kissing or touching, or intercourse or any other form of sex.

1. Yes
2. No
3. Prefer not to say

[If EverSexExp1 = 'Prefer not to say' (3) OR 'no' (2) skip to next section 'sexual and romantic lives during covid- part 1']

### EverExpGen

[Ask if Eversexexp1=Yes (1)]

Multiple answers

Was this person / these people...

**Select all** that you have ever had sexual experience with

1. Male
2. Female
3. Transgender or non-binary
4. Prefer not to say

[If EverExpGen= 'Prefer not to say' (4) skip to next section 'sexual and romantic lives during covid- part 1']

## SexpartOpp (Derived variable for use in scripting)

If everexpgen=male (1) and genderidentity=cisgender woman (2) == [derived variable] sexpartopp=1 (opposite sex partners)

If everexpgen=female (2) and genderidentity=cisgender man (1) == [derived variable] sexpartopp=1 (opposite sex partners)

For all other combinations, sexpartopp=0 (no opposite sex partners)

## SexpartSS (Derived variable for use in scripting)

If everexpgen=male (1) and genderidentity=cisgender man (1) == [derived variable] sexpartss=1 (same sex partners)

If everexpgen=female (2) and genderidentity=cisgender woman (2) == [derived variable] sexpartss=1 (same sex partners)

For all other combinations, sexpartss=0 (no same sex partners)

## GeniOpp (sex with opposite-sex partners)

[Ask if sexpartopp = opposite sex partners (1)]

Single answer

Have you ever had sex with a *(man (textfill if genderidentity=2)/* woman *(textfill if genderidentity=1)*? That is, oral, vaginal, or anal sex.

2. No
3. Prefer not to say

## GeniM – Sex with men (for trans respondents)

[Ask if genderidentity=3 (transgender person) & everexpgen=1 (male)]

Single answer

Have you ever had sex with a man? That is, oral, vaginal or anal sex, or any other contact involving the genital area.

1. Yes
2. No
3. Prefer not to say

## GeniW – sex with women (for trans respondents)

[Ask if genderidentity=3 (transgender person) & everexpgen=2 (female)]

Single answer

Have you ever had sex with a woman? That is, oral, vaginal or anal sex, or any other contact involving the genital area.

1. Yes
2. No
3. Prefer not to say

[Ask if 'everexpgen=transgender or non-binary (3)']

Single answer

Have you ever had sex with someone who was transgender or non-binary? That is, oral, vaginal or anal sex, or any other contact involving the genital area.

[Add clickable info button with the following text: oral = "A person's mouth on a partner's genital area"]

2. No
3. Prefer not to say

**PartInt**

[Ask if any of GeniOpp= Yes (1), OR GeniSS = Yes (1), OR GeniM= Yes (1), OR GeniW= Yes (1), OR GeniT= Yes (1)]

These questions are about the number of people you have had sex with at different times in your life. Your answers to these questions provide context for the questions that follow.

Please include everyone you have ever had sex with, whether it was just once, a few times, a regular partner or a spouse. Be as accurate as you can: please count if possible, and give your best estimate if you can't remember exactly.

### ReConSIn

[ASK ALL WHO REACH THE END OF THE SURVEY]

## Thank you for taking the time to complete this survey.

We appreciate your time in helping us understand health, sex and relationships during COVID-19. The results of this survey will be made available via [www.natsal.ac.uk](www.natsal.ac.uk).

The research team would like to understand how relationships and sex change over time and may wish to send you a further, similar survey.

You do not have to decide now whether you would actually do the survey, just whether it would be OK for a member of the research team to contact you about it.

### ReConSQ

[ASK ALL WHO REACH THE END OF THE SURVEY]

Would you be willing for Ipsos MORI to re-contact you about a further survey, as part of this project about health and relationships on behalf of the University of Glasgow, University College London (UCL) and London School of Hygiene and Tropical Medicine (LSHTM), within the next 12 months?

1. **Yes, I would be willing**
2. **No – I would not be willing**
