## General user notes

1. This questionnaire was administered to the address-based probability sample (Postcode Address File; hereafter 'PAF') and the probability panel telephone (using the Computer-Assisted Telephone Interviewing tool; hereafter 'CATI') arms of Natsal-4.
2. The questionnaire was delivered to PAF respondents either face-to-face or over the telephone by interviewers. It was delivered to CATI respondents over the telephone by a telephone interviewer. Therefore, where this document refers to a 'telephone interview', it refers to both the PAF telephone and CATI interview.
3. Where this document refers to the 'PAF', it refers to both the PAF face-to-face and the PAF telephone interview.
4. Throughout the questionnaire, **variable names** are shown in dark blue font.
5. **Question routing** is shown in black bold font underneath variable names and was used to ensure that respondents were only asked questions relevant to them. For example: IF (AskCasiN4=1 'Has had sex since turning 13') THEN
6. Text in red above the variable names gives the **routing instructions** in plain English.
7. Interviewer instructions for questions which the interviewer read out are marked with **INTERVIEWER**.
8. Text fills are presented in '<>', with routing instructions for text fills given in plain English (e.g., <text fill for transgender or non-binary respondents: 'This does not apply'>).
9. Respondents who told us that they had not had sex since turning 13 at the First Sexual Experiences section skipped most of the self-completion questions relating to sexual behaviour as the questions. The background variable AskCasiN4 was used to route respondents through the questionnaire according to whether they have had sex or not.
10. Some of questions were read out by the interviewer (Introduction – Gender Identity, Attitudinal Questions and Demographics modules). The rest of the questionnaire (First Sexual Experiences – Self Completion End Questions modules) were self-completed by the respondent using the Computer-Assisted Self-Interviewing (hereafter 'CASI') tool.
11. For some interviewer-administered questions, showcards displaying response options were used.
12. We recommend users read notes corresponding to particular modules before proceeding to these sections of the questionnaire.

## Notes on specific questionnaire modules

### Interviewer-administered general health module

Respondents aged 16 and 17 in the PAF were not asked questions about alcohol and smoking in this section, but were asked these questions in the self-completion instead (see CASI Health). There were no 16- and 17-year-olds in the CATI.

### Family and learning about sex module

Response options for LearnMost and LearnMor were shown in a different order, depending on which showcard.

### Sexual attraction and experience module

PAF respondents who answered 'in another way' at the gender identity question at the beginning of the interviewer-administered section (CASI/CATI) had the showcard randomised by the interviewer. For example, response option 1 would have been either 'only with males, never with females' or 'only with females, never with males', dependent on the showcard.

### Natsal-4 definitions of sexual experience and sex

Natsal-4 distinguishes between **sexual experience** (touching, kissing, anything else that might have felt sexual) and **sex**. Sex is defined differently for opposite sex pairings vs the other five respondent-partner pairings.

#### Definition of opposite sex sex

Opposite sex is defined as between **a cisgender man and a cisgender woman**. Opposite sex sex is defined as oral, vaginal, or anal sex. Help screens shown to respondents in these modules were:

**ORAL SEX:** A person's mouth on a partner's genital area.

**VAGINAL SEX** (vaginal sexual intercourse): A person's penis in a partner's vagina.

**ANAL SEX** (anal sexual intercourse): A person's penis in a partner's anus (rectum or back passage).

#### Definition of same sex sex

Same sex sex is defined as between either **two cisgender men or two cisgender women**. Same sex sex is defined as oral, vaginal, or anal sex or any other genital contact. Help screens shown to respondents in these modules were:

**ORAL SEX:** A person's mouth on a partner's genital area.

(If respondent is a cisgender woman): **VAGINAL SEX:** Inserting something, e.g. a finger, hand, sex toy, or something else into a partner's vagina.

(If respondent is a cisgender man): **ANAL SEX** (anal sexual intercourse): A person's penis in a partner's anus (rectum or back passage).

(If respondent is a cisgender woman): **ANAL SEX:** Inserting something, e.g. a finger, hand, sex toy, or something else into a partner's anus (rectum or back passage).

**OTHER GENITAL CONTACT:** For example, stimulating by the genital area finger or hand.

**Definition of sex for all other respondent-partner gender pairings**

There are four other respondent-partner pairings besides opposite sex and same sex. For these four others, sex is defined as oral, vaginal, or anal sex or any other genital contact. Help screens shown to respondents in these modules were:

**ORAL SEX:** A person's mouth on a partner's genital area.

(If there **was** a penis involved: **VAGINAL SEX** (vaginal sexual intercourse):

A person's penis in a partner's vagina.

(If there **was not** a penis involved: **VAGINAL SEX**: Inserting something, e.g. a finger, hand, sex toy, or something else into a partner's vagina.

(If there **was** a penis involved: **ANAL SEX** (anal sexual intercourse): A person's penis in a partner's anus (rectum or back passage).

(If there **was not** a penis involved: **ANAL SEX**: Inserting something, e.g. a finger, hand, sex toy, or something else into a partner's anus (rectum or back passage).

**OTHER GENITAL CONTACT:** For example, stimulating by the genital area finger or hand.

**Textfills**

The computer program showed '(man/men/he/him/his)' or '(woman/women/she/her)' in questions, depending on the gender of the partner being asked about.

**First sexual experiences module**

There are a total of **six loops** in the first sexual experiences module: one for each of respondent's first sexual experiences with three different genders (men, women, and trans/non-binary partners), with separate loops for cisgender respondents and trans/gender diverse respondents.

The order in which respondents were asked about first sexual experience with each of the three genders was based on the gender they reported as their first sexual experience (variable Part1Sex). For cisgender respondents, the combinations are opposite sex, same sex, and sex with a trans/non-binary partner. Trans/gender diverse respondents were asked similar questions about male, female, or transgender or non-binary partners (according to which genders they had had sexual experience with).

**Sexual practices and numbers of partners modules**

There are a total of **six loops** in the sexual practices and numbers of partners modules, respectively: one for each gender with whom the respondent reporting having sex with since turning 13 (men, women, and trans/non-binary partners), with separate loops for cisgender respondents and trans/gender diverse respondents.

Cisgender respondents were asked about opposite sex partners first, then same sex partners, and then transgender and non-binary partners. Transgender and non-binary respondents were asked about sex with women first, then men, and then transgender and non-binary partners.

## Most recent partners module

This section was asked of respondents who reported at least one partner in their lifetime. If the respondent reported more than one partner in the last 5 years, they were asked the same set of questions twice: first about their most recent partner and then about their second most recent partner.

If the respondent had only ever had one partner, then some of the questions in this section would have repeated information that had previously been given to us by the respondent through their answers to questions in the first sexual experiences section of the questionnaire. To acknowledge this potential for repetition there are two versions of the introduction to this section ('IntroR1' and 'IntroR2') which were shown depending on whether the respondent had reported one or more partners in the last 5 years.

The text (*that person/name*) was automatically filled by the computer program depending on whether the respondent reported one or more partners in the last 5 years. If the respondent had reported one partner, the text '*that person*' was filled. If the respondent reported more than one partner the initial or nickname of the person, captured at R1Name was filled by the computer program instead.

## Sexual violence module

Sexual violence (including sexual harassment) was asked of:

- Respondents aged 18 and over, regardless of whether they reported ever having had sex.
- Due to the sensitive nature of the questions within this section these questions were not asked of respondents if the respondent had asked for the self-completion questions to be read out by the interviewer (the option to have the self-completion questions read out was only available to PAF respondents who completed the interview face-to-face).

## Reproductive health module

This section was asked of respondents whose sex described at birth was female (question: SexBirth\_Final), regardless of the respondent's current gender identity, and who have had sex with a partner of any gender since turning 13. This included respondents who have only had sex with women, as they may have conceived through in vitro fertilisation (IVF). An additional answer option of 'this does not apply' appeared at the question CurrPreg for transgender and non-binary respondents whose sex at birth was female.

## Sexual transmitted infections module

Most questions in this section (e.g. questions on use of sexual health services and diagnosis of sexually transmitted infections) were only asked of respondents who said they had had sex since turning 13.

### **Sexual function module**

Respondents who said they have never had a sexual experience or encounter only answered SFFSatis and SFFDst.

Respondents who were aged under 18 and said they have never had vaginal or anal sex only answered SFFSatis, SFFDst, Frequent, EasTalkA/EasTalkB, SexImport in this section.

### **Sexual well-being module**

Questions in this section were shown to all respondents who said they had had sexual experience of any kind (question: EverSexExp). However, respondents who said they had not had sex in the past four weeks (in the sexual practices module) answered only the first sub-section of questions in this section (SWComfortMeSex – SWSexLifeOptim). Respondents who said they had had sex in the last four weeks were asked all questions in this section.

# QUESTIONNAIRE CONTENT

## Introduction

Ask all

**IntCons**

Single answer

**INTERVIEWER:** Before you start the interview, go through the survey information leaflet with the respondent and answer any questions.

Confirm that the respondent has read and understood the survey leaflet and agrees to take part in the interview.

1. Information understood by respondent and agrees to take part
2. Information not understood by respondent

Show if the information leaflet had not been understood by respondent

**IF (IntCons=2 'i.e. information not understood') THEN**

**IntNo**

**INTERVIEWER:** Do not conduct interview, route to end.

Ask if respondent is taking part in a telephone interview

**Introremote**

Single answer

The interview contains some personal questions. Before we begin, can I check you are happy you're somewhere private enough to continue? Please just say 'no' if it isn't.

**INTERVIEWER:** you may want to encourage the respondent to go somewhere they can be alone

1. Respondent has confirmed it is private enough to continue
2. Not private enough

Ask if respondent said the location was not private enough

**IF (introremote=2 'not private enough') THEN:**

**Introremotenot**

Single answer

Can I check whether you are able to move somewhere more private, or if you would like to reschedule to do the interview at a different time?

1. Yes, continue
2. No, reschedule the interview

Ask if respondent said the location was private enough

**IF (introremote=1 'private enough') THEN:**

**Intro1remote**

If anything changes and it's no longer private enough to continue, just let me know that you'd like to take a break, and we can carry on another time.

I would also like to remind you that if we come to any question that you don't want to answer, just let me know and we'll go onto the next question.

Ask all

**ODoB**

Numerical answer

Before we start the interview, I'd like to ask a couple of questions. Can I check first: What is your date of birth?

**INTERVIEWER:** Enter in the format dd/mm/yyyy.

**INTERVIEWER:** Please try to get the exact date of birth. If they are not willing to provide the day of birth, please enter '01' for the day. If they are not willing to provide the day and month of birth, please enter '01' for the day and '06' for the month and then their year of birth.

Show to respondent if date of birth provided by respondent

**IF (ODoB = date entered) THEN**

**DOBEst**

Single answer

**INTERVIEWER:** Is this the participant's exact date of birth (as far as you are aware)?

1. Yes
2. No

Ask if respondent provided a date of birth

**IF (ODoB = date entered) THEN**

**OwnAge**

Single answer

Can I just check, your age is <text fill respondent's computed age>?

1. Yes
2. No

Show to respondent if date of birth refused by the respondent

**IF (ODoB = NONRESPONSE) THEN**

**WarnEnd**

Single answer

**INTERVIEWER:** We are unable to use data without date of birth. If respondent is really unwilling to give exact date of birth, please explain you can enter 01/06 and their year of birth. If they are still unwilling, then please explain we cannot interview them.

Show to respondent if date of birth refused by the respondent

**IF (ODoB = NONRESPONSE) THEN**

**DOBRef**

**INTERVIEWER:** Please confirm date of birth has been refused, so interview with this respondent will terminate. If you are able to obtain date of birth, please arrow left to field ODoB to enter the date of birth. You can enter 01/06 and the year of birth.

Ask all

**Gender\_Init**

Single answer

**INTERVIEWER: SHOWCARD A**

Which of the options on this card describes how you think of yourself?

**INTERVIEWER:** Do not probe.

**INTERVIEWER:** If a respondent explains that they identify as trans (trans man/ trans woman/non-binary), advise them that they can choose whichever option they feel best describes them. This will be used to make sure we ask them the right questions throughout this interview. If they choose to answer 'In another way', they will be asked what this is at the next question.

1. Man/boy
2. Woman/girl
3. In another way (please describe)

Ask if respondent said 'in another way' to the last question ('Gender')

**IF (Gender\_Init=3 'in another way') THEN**

**GenIdX**

Text answer

Please tell me how you would describe your gender. If you prefer, you can type it in directly to the laptop.

## First Sexual Experiences: Transgender Or Non-Binary Partners (Amongst Cisgender Respondents)

Questions in this section were asked of cisgender men and women about sexual experiences with trans/non-binary partners. In this respondent-partner type combination, sex is defined as includes oral, anal, or vaginal sex, or any other genital contact.

The help screen that was available to respondents in this section was:

**ORAL SEX:** A person's mouth on a partner's genital area.

**VAGINAL SEX** (vaginal sexual intercourse): A person's penis in a partner's vagina.

**ANAL SEX** (anal sexual intercourse): A person's penis in a partner's anus (rectum or back passage)

**OTHER GENITAL CONTACT:** For example, stimulating the genital area by finger or hand.

Ask if respondent is a cisgender man or woman and has had sexual experience with a trans/non-binary partner.

## First Sexual Experiences With Women Partners (Amongst Trans/Gender Diverse Respondents)

Questions in this section were asked of trans/gender diverse respondents about sexual experiences with women. In this respondent-partner type combination, sex is defined as oral, anal, or vaginal sex, or any other genital contact.

The help screen that was available to respondents in this section was:

**ORAL SEX:** A person's mouth on a partner's genital area.

(IF (TRGen=1 or 3) OR (TRCheck=1): **VAGINAL SEX** (vaginal sexual intercourse): A person's penis in a partner's vagina.

(IF TRGen=2): **VAGINAL SEX** (vaginal sexual intercourse): Inserting something, e.g. a finger, hand, sex toy, or something else into a partner's vagina.

(IF (TRGen=1 or 3) OR (TRCheck=1): **ANAL SEX** (anal sexual intercourse): A person's penis in a partner's anus (rectum or back passage).

(IF TRGen=2): **VAGINAL SEX** (vaginal sexual intercourse): Inserting something, e.g. a finger, hand, sex toy, or something else into a partner's anus (rectum or back passage).

**OTHER GENITAL CONTACT:** For example, stimulating by the genital area finger or hand.

Ask trans/gender diverse respondents (except those who answered 'yes' at Transpart, who will skip this and answer Part1Sex)

IF (Groute=3 AND (TRGen=1 'Ask me questions for people who have only ever had a penis', 2 'Ask me questions for people who have only ever had a vagina' or 3 'Ask me questions for people who have had a penis and a vagina' OR TRCheck= 1 'Continue with questions on sexual activities') AND (TransPart= 1 'No' or 3 'Not sure') THEN

**EverSexExp**

Single answer

Just to check, have you ever had **any** kind of sexual experience or sexual contact with another person? This includes anything that felt sexual to you. It could be kissing or touching, or intercourse or any other form of sex.

1. Yes

0. No

Ask if respondent is said they have ever had sexual experience at EverSexExp or that they have had sexual experience with a trans/non-binary partner at TransPart.

### IntroR2

The next questions are about the people you have had sex with most recently.

These may be someone you had sex with once, or a few times, or regular partners or a husband/wife/married partner/civil partner.

We will first ask you about the person you had sex with most recently, then about the second most recent person you had sex with.

**Please start by thinking about the person you had sex with most recently**, whether this was quite recently or some while ago.

Ask if respondent had more than one partner in the last 5 years (in the numbers of partners module)

**IF (Opp5Yrs + SS5Yrs + T5Yrs + W5Yrs + M5Yrs + TT5Yrs  $>$  1) THEN**

**IF (Satis=1 'change one or more answers') THEN**

### Amend

Please ask the interviewer for assistance about how you may go back to a question in order to change your answer.

The interviewer will NOT have to look at the computer screen or be told any of your answers in order to help.

When you come back to this screen,

Ask if respondent agreed to complete the self-completion section

### Addinfo

#### Single answer

Before you hand the laptop back to the interviewer, is there anything else you would like to tell us? For example, do you have any suggestions for ways we could improve the questions, or would you like to give us any feedback? The research team will use this feedback to improve the survey for people who take part in the future.

1. Yes, I have more to add
2. No more to add

Ask if respondent agreed to complete the self-completion section

**IF (Addinfo=1 'Yes') THEN**

### AddinfoYes

## Biosampling Consent

### VAGINAL SWABS CONSENT

If administering the interview face-to-face, show to respondent if respondent is a cisgender woman. If respondent is participating over the telephone, the routing for this question relies on gender identity (and not grouse, which takes into account both sex at birth and gender identity)

**IF (PAF face-to-face: Groute=2 'cisgender woman') OR (PAF telephone or Panel CATI: Gender\_Final=2 'woman') THEN**

#### **SwabIntr**

**INTERVIEWER READ OUT:** Thank you, that is the end of the questions. I would now like to ask if you would be willing to take part in the next part of the study which is to provide some vaginal swab samples. This simply involves you collecting 3 swab samples using small cotton swabs <text fill if PAF telephone interview: 'which I will send to you in the post'> <text fill if CATI telephone interview: 'which will be sent to you in the post'>. The samples will be tested for some infections that can be passed on through sexual activity <text fill if CATI telephone interview: 'as well as other microbes that are harmless and live in the genital tract. Anyone can provide samples regardless of whether you have had sex before, you are pregnant or on your period.'>. <text fill if PAF face-to-face interview: 'This leaflet gives you more information about this part of the study.'> <text fill if PAF or CATI telephone interview: 'There is an information leaflet about the vaginal swab sample in the pack that I gave you.'>
